American Psychiatric Publishing. Paperback. Book Condition: new. BRAND NEW, Psychiatric Services in Correctional Facilities (3rd Revised edition), American Psychiatric Association, The long-awaited report of the APA's Work Group to Revise the APA Guidelines on Psychiatric Services in Correctional Facilities, Psychiatric Services in Correctional Facilities comes at a time of growing incarceration rates, more rigid sentencing policies, harsher sanctions, and tougher public attitudes toward crime. The result is a near-doubling of the incarcerated population since the first report was issued in 1989 and a significant increase of inmates with serious mental health issues. The work group members address the implications of this troubling state of affairs for psychiatrists and other mental health practitioners who diagnose and treat within the correctional environment. On the basis of extensive input from multiple sources and perspectives, they have developed clear guidelines that equip clinicians to navigate the special challenges they face. This edition has been thoroughly updated and is structured to flow from the foundational principles that govern the delivery of psychiatric care in correctional facilities, to the guidelines for screening, referral, evaluation, treatment, and community reentry planning, to special applications of the principles and guidelines to specific disorders/ syndromes, patient populations, housing locations, treatment modalities, and inmate special needs. Readers will find the book well written, with clear guidance for the clinician, as well as challenges to think beyond the needs of individual patients to the larger relationship between mental illness and incarceration. * Approximately three of every four incarcerated people with a serious mental illness have a co-occurring substance use disorder, complicating both diagnosis and treatment. The book offers strategies for treating co-occurring disorders and explores the need for evidence-based screening tools. * Because some inmate populations have unique evaluation and treatment needs because of their disorders, demographics, or other characteristics, separate sections...
