

The New Phytologist Volume 1-2

By Arthur George Tansley

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 112 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: . . . representatives who gave informal accounts of their observations for the benefit of the rest at the last class of the Session. These accounts occupied about fifteen minutes each, and were supplemented by observations of others who had worked in the same set. The show of seedlings in boxes was really exciting. Many kinds were tried and the following were found very useful: --beans, peas, lupins, vegetable marrows, tropieolums, mustard, cres: , , buckwheat and maize. One bean-seedling grew to twenty-seven inches above the sawdust, and showed flowers after about seven weeks growth. Great interest was aroused by the varying length of shoot from a single bud, the connections between branching and veining, and the position and movements of flowers as protection against rain. The greatest value of this method seems to me to lie in the actual experience of practical difficulties (even of growing seedlings, or measuring...
