

The Messenger of Mathematics Volume N . 23-24

Filesize: 3.95 MB

Reviews

Complete guideline for ebook lovers. Better then never, though i am quite late in start reading this one. Its been printed in an remarkably simple way in fact it is only right after i finished reading this book through which in fact transformed me, alter the way in my opinion.

(Montserrat Runolfsdottir)

THE MESSENGER OF MATHEMATICS VOLUME N . 23-24

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: . 4 in the formula of 21 and 24, we find so that $4 \log A = -7 - 4 \log 2$ but this formula does not converge so rapidly as that given in the preceding section. 47. We can obtain another equation for $\log A$ by comparing the results in 31 and 32, but the formula so obtained requires the calculation of two series. 48. When I wrote the paper upon $\log 2$ in Vol. VI. of the Messenger (1877) I was not aware that this product had been considered before. I have recently found, however, that on page 97 of Vol. V. of the Quarterly Journal (1862) the late Mr. H. M. Jeffery gave the formula $\log 2 = \frac{1}{2} \log \frac{1}{3} + \frac{1}{3} \log \frac{1}{4} + \frac{1}{4} \log \frac{1}{5} + \dots$, and determined G as 0.24875. This C is the same as $\log A$ of this paper (26). Apparently Jeffery did not seek to. obtain converging series for the calculation of C , Values of some other products, 49--55. 49. By integrating between the limits x and 0 the equation $\log(1+x) + \log(2+x) + \dots + \log(n+x) = \log(1.2.3 \dots n) + 8x + Sx^2 - c$, where $S = 1 + \frac{1}{2^2} + \frac{1}{3^2} + \dots$, it is easy to show that $(1+x)^{1+2+3+\dots+n} = \frac{1}{n!} \left(\frac{1}{1+x} \right)^{1+2+3+\dots+n} = \frac{1}{n!} \left(\frac{1}{1+x} \right)^{\frac{n(n+1)}{2}}$ where $M = -A x + x c$. On the expansion of powers of the trigonometrical ratios in terms of series of ascending powers of the variables, PP-9t--10S....
