

Grace: The Fifth Fundamental Force of Nature: A Common Denominator

Filesize: 2.89 MB

Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, altered the way I believe.
(Prof. Loyce Runolfsson Jr.)

America Star Books, United States, 2007. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.In December of 1900 Max Planck defined the discrete quantum of electromagnetic energy. Planck's quantum was subsequently expanded by Einstein and others, forming a new perspective of reality. Central to the quantum perspective is a probability function that disagrees with the classical Greek concept of a cosmic architecture that was explainable by objective and standard geometric principles. The quantum brought to center stage a rationality that hinges on subjectivity, observer experiences, and randomness. The quantum significantly modified classical principles initially established by the Greek philosophers that supported an objective and deterministic reality. With the quantum came beliefs that nature and reality are dependent only on our experiences; reality is not a single objective event, but an array of subjective interpretations. A conscious observer, his experiences, inductive thinking, subjectivity, and metaphorical interpretations within the concept of complementarity became the norm. Within this framework of reality are four fundamental forces of nature: gravity, electromagnetism, the strong nuclear force, and the weak nuclear force. This effort introduces a fifth force, grace, that is also present within the fabric of creation. Grace is actually the envelope in which the four fundamental forces dwell. The focus of this book is that grace, when recognized as the fifth force, can become a mediating and common denominator for much of the religious polarization that is evident across our globe.
